EDUCATION

Portland State University

Portland, OR

Bachelor of Science in Computer Science (University Honors College)

Sept. 2021 – Dec. 2025

- **Thesis:** Experience from a Distance - Improving Transparency for the Multnomah Athletic Club
- Collaborated with a cross-functional team to deliver a scalable web application addressing remote marketing and user engagement challenges
- Developed an intuitive frontend featuring 360-degree photography and a dynamic interactive mapping system, utilizing modern JavaScript frameworks

EXPERIENCE

Snorkel AI

Remote

Task Based AI Expert Contributor: DevOps

April 2026 – Present

- Refine LLM code-generation and technical outputs using approved AI tools to ensure high accuracy, clear documentation, and adherence to software engineering best practices
- Design complex, edge-case prompts to stress-test AI reasoning in full-stack JavaScript and backend development scenarios
- Actively contribute to a high-trust environment through rigorous quality evaluations, peer feedback, and knowledge sharing on training datasets

Intel

Hillsboro, OR

Inventory Technician Intern

May 2023 – Present

- Create custom scripts to automate and streamline work processes, supporting operational reliability
- Coordinate efforts with ops partners and management to audit inventory and manage worldwide shipping logistics for electronic components
- Received a letter of recognition from management for quality control and reporting excellence

PROJECTS

UAV Flight Optimizer | *React, TypeScript, JavaScript, Python, MapboxGL, Go*

- Developed an interactive mission planner frontend to visualize 3D flight paths, parsing geospatial data to create an elegant, understandable user experience
- Engineered a custom physics and pathfinding engine utilizing a 3D A* algorithm weighted by energy consumption
- Integrated automated testing and monitoring services to fetch real-time 3D wind vectors and topographic elevation data via RESTful APIs

Lunar Gateway Autonomy | *React, TypeScript, FastAPI, Python, Go, SQL*

- Designed a React and TypeScript visualizer to track system states, monitor power grids, and parse structured logistics data in a high-reliability environment
- Built a backend telemetry ingestion module for complex data scheduling, ensuring optimal performance and service reliability
- Architected an autonomous decision engine to manage simulated station operations, cleanly separating logic across the development stack

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL, Python, C++, C, Go, Rust, Kotlin

Frameworks/Technologies: React, React Native, Node.js, Spring, Express, Prisma ORM, Kafka, Docker

Systems/Tools: AWS, Git, GitHub Actions, Terraform, PostgreSQL, MongoDB, Linux, Redis

Concepts: Full Stack Development, RESTful APIs, Unit/Automated Testing, CI/CD, Concurrency

ACTIVITIES & LEADERSHIP

Computer Action Team

Portland, OR

Front Desk Volunteer

2023 – 2024

- Responded to technical support tickets, diagnosing and resolving complex software issues
- Collaborated with students and faculty to improve administrative tasks and maintain system reliability

Civil Air Patrol

Hillsboro, OR

Cadet Technical Sergeant

2016 – 2020

- Participated in the Air Force's annual National CyberSecurity competition, focusing on network defense
